Benstor Lowry has introduced the following joint resolutions relative to improvement of the Obto river and enlargement of the Eric Capal:

Ohlo river and chlargement of the Eric Canal:
Whereas, The Constitution of the United States
vests in Congress the excinsive right to regulate
commerce between the several States of the
Union; and whereas the Ohlo river is a great
and important time of internal communication in which many of the States of this Union are in terested; and whereas the survey nearly comicressed; and whereas the survey nearly com-plated by eminent angineers in the employ of the National Government will demonstrate that this great channel of commerce can be put in good and permanent condition for the passage of atcamboats at all seasons of the year, when un-obstructed by ice, for a sum not acceding twenty millions of dollars; therefore, Besoived, That in the opinion of the people of feanaylysals, the importance of this great chan-nel of commerce will fally justify the expendi-ture of the sum name.

Mr. Wm. Jumner was the next speaker lie had gathered from Mr. Moorbeal's remarks the one leading fact that the impression existed in, the minds of members of Congress that petroleum came directly from the ground without coating anothers.

and directly from the accumulation may be made, anything.

General Moorhead—I do not wish to be under tood as saying that it cost nothing to get oil, as pointing to his pocket) I am satisfied such is not he case. [Laughter]

Mr. Summer continued by stating that the six undered and thirty wells in the oil region promocel tess than eighteen barrels of oil each per ag, which was sold under two dollars per barrels of the control of the contr

If required about \$3,500 to sink a well, and with the labor, expenses, etc., there was no profit to the working interest, the only profit, if any, was to regalty and landed interests. The average price of 60 would not more than pay for pro-ducing it. Wells which pumped eighteen barrels per day were forced to suspend, because they did not resure enough to pay current expenses. Per troleum was an article of necessity, and it was wrong to single it out for special taxation. Re-fineries could now be parchased at fifty per cont. on their cost, and the speaker was willing to dis-pose of his own on those terms.

TAX ON OIL FOR EXPORT

General Moortead returned has thenks for the compliment bestowed on him. He alluded to the as on oil, and asked that the Convention come to some definite conculon, place it in the shape of a law, and forward it to Washington The members of Congress wanted help from sound, practical men The tax of twenty five cents per barrel for export, was not intended for revenue, but to easiet the honest refloer, and give him an opportunity to have a share in the 40,000,000 gal-long required for bounce consumption

THE OIL IMPROVED.

Mr Downer stated that the main thing required was to see that the tax was collected. The Government had been trying for three years to do so, but had not succeeded, and would not until a higher degree of honesty and intelligence was emblisted by the Government impectors Mr Kirk moved that General Moorhead be invited to be present at the sessions of the Convention.
